

## OBJECTIVES

Published on TESTBED (<https://testbed.esipfed.org>)

---

### [OBJECTIVES](#) [1]

The **ESIP Testbed** is an environment where technology, standards, services, protocols, and best practices can be explored and evaluated. The Testbed serves as a forum for innovative collaborations across all sectors of the [ESIP Federation](#) [2] to improve availability and access to our member products and services for mutual benefit. Comments about each current Testbed activity can be shared within this environment.

This **ESIP Testbed Portal** provides support for all ESIP members to interact with hosted Testbed activities and provide comments and feedback on the demonstrated technologies. Please refer to [this user manual](#) [3] for detailed information.

**ESIP Testbed Projects** are implementations by teams of ESIP members that advance data science and management in a way valuable to ESIP community members. These projects are shared and documented on the Testbed Portal. Find information on [Past Testbed Tasks](#) [4] here.
