Call for Testbed Projects, April 2016 Products & Services Testbed RFP [1]

The ESIP Products and Services Committee announces the April 2016 call for Testbed projects. Projects for this call should focus on innovative and collaborative implementation of new ideas and technologies, in keeping with the strong tradition of Testbed projects pursued in the past. ESIP works through the Testbed to provide resources to support such projects throughout the project lifecycle. This proposal round offers three project types: incubator projects (proofs of concept), prototype projects (extension of a more mature projects), and fast-track projects (improvements to the Testbed evaluation efforts). Details about these project types and how to propose are in the attachment below. If you have any questions, please send questions to the Testbed Configuration Board at tcb@esipfed.org [2].

Proposals may be submitted by any ESIP organization, an individual within such an organization, or a team of such individuals. Civil servants are restricted from receiving ESIP funds.

We're looking forward to some great projects from you all!
