

[ESIP 2012 Winter session planning](#) [1]

Submitted by cisc on Fri, 2011-12-16 08:50

What are the Discovery Cluster topics?

One topic may be a recap of the charrette, joint breakout of discovery and ESC

Basic planning meeting, to plan goals for the next six months

Discuss plans for moving forward on the testbed

Workshop/breakout for GeoPortal demo or progress report

Need titles, main speakers, short abstract by next week for scheduling a winter meeting session

Proposed Sessions

a face-to-face meeting for wrapping up DCPs

New DCPs

DCP for error handling not discussed (but it is implied for OpenSearch to use HTTP error codes)

Casting demos

The theme is collaboration, how can casting/discovery conventions support collaboration

Ruth will be able to show next step beyond July demo (aggregating casts from distributed sources, making available to portal using OpenSearch)

Need to focus on demos/use cases that align with collaboration theme

Part of planning session: What are the implications for discovery conventions in the ESC?

How do we move forward on a more collaborative discovery cluster?

How can the discovery services meet the requirements of the ESC? (joint-session with ESC)

Winter meeting is shorter, so not as much time for demos/workshops

The ESRI demo/participation in Winter Meeting will be coordinated by the Discovery cluster

ACTION ITEM: Submit the abstracts for the Winter Meeting sessions
