Acquia Marina	6.x-3.1	7.x-2.0-beta1
Fusion	6.x-1.x-dev	7.x-2.0-beta2
Pixture Reloaded	6.x-3.2	

2. Configurations

- a. **File** module replace the upload module.
- b. **Image** module is replaced by the core functions of Drupal 7

- c. **Project** module: no official release <http://drupal.org/node/834252>. Please closely watch the available updates and patches. Newly added modules are required by **Project**.
 - d. The content type “Project” does not show all fields as the v6. We also extended the fields of project to upload more files and images. This page is configurable.
 - e. **View** set up: the php codes to filter files are replaced with view settings including a list of project files, a list of projects and a list of events.
 - f. The original accounts are removed due to the upgrade.
 - g. **Event** is replaced by **Events calendar feature**
 - h. **Module**. The **Fusion** is enabled to support the **Acquia Marina**. Do not enable/install Skinar at the same time.
 - i. Depending on the integration with ESIP database, the control of page access should be reconfigured.
 - j. The upload path should be reconfigured to meet the management of different projects.
